

Preferred Networks, Inc. (PFN) is a technology company with the mission: “Make the real world computable and create the future together.” PFN develops advanced software and hardware technologies through a vertically integrated approach, covering the entire AI value chain—from chips and supercomputers to generative AI foundation models, solutions, and products for a wide range of industries. Founded in 2014 in Tokyo, PFN is currently developing the MN-Core™ series of AI processors, the PFCP™ cloud service for AI computing, the Japan-made large language model PLaMo™, and solutions for multiple industries.
